Readme ‘final_data.csv’

Unit of observation: Each row represents a unique site × timestamp combination in ‘final_data.csv’

Column Descriptions

Location & Time

- PCT – Timestamp in Pacfic Time (YYYY-MM-DD 00:00:00)
- Day – Day of observation (YYYY)
- Distance_m – Distance upstream from gage house (m)
- wet_dry – Wet/dry period
- site_position – Identifier of site

Dissolved oxygen &

- DO_mg_L – Dissolved oxygen concentration (mg/L)
- P_mbar – Barometric pressure (mbar) measured as the average of the bottom and top of the study reach
- DO_sat_percent – DO saturation (%) converted from barometric pressure
- DO_deficit_pct – DO deficit relative to saturation (%)
- Water_temp_C – Water temperature (°C) from miniDOT DO sensors
- air_temp_par – Air temperature at PAR sensor in understory (°C)

Light & Radiation

- PAR_understory – Photosynthetically active radiation at understory (μmol/(m^2·s))
- benthic_light – Light intensity at benthic level (lum/ft^2)

Gage measurements

- Gage_EC_us_cm – Electrical conductivity (μS/cm)
- Discharge_L_s – Discharge (liters per second)
- Gage_precip_accumulate_mm – Total precipitation (mm) accumulated over the water year
- Gage_precip_total_mm – Total precipitation (mm) accumulated over the timestamp
